PREPARATION:

Washing: Power wash and/or hand wash all areas we will be painting staining as needed, using a proper cleaner to remove mildew. We typically power wash your property before starting the job and this can potentially remove paint from the substrates. The paint chips tend to get blown around and are tough to cleanup until they dry out, the crew will clean them up once we start preparation.

 Caulking: Caulk gaps and cracks as needed to areas we are painting to seal out moisture and drafts using a 50 year paintable urethane caulk. We will remove any cracked/falling sealants and replace with new as needed.

Scraping: Scrape all loose and peeling paint to ensure a firm base for the new paint.
